Just for Fun:

Raising pigs became an important commercial enterprise during the 1800s when Midwest farm regions were settled. The new Erie Canal gave farmers a way to get their pigs to the cities back east. Farmers started calling their pigs, "Mortgage Lifters," because the profits from their sales paid for the new homesteads.

Meet the Staff:

All the way from Holland, we introduce Gerdine Oosterwijk, who joined the force approximately eight months ago. Gerdine soon fit right in, and after a few months was introduced to the extending process. One day, while extending, her co-worker was wondering why she would bend down and focus so intently on the extended product. It was assumed she wanted a good look. When Gerdine was asked what she was doing, she informed us that she was trying to get the measurement to the correct millimeter. After a chuckle, we informed her that it was for this reason that the jug was placed on the scale. "Oh" she said, "I was wondering why that was done." A little later she said, "Wow, is this ever fast!"
